

The following release notes describe changes in Event 1 Forecast between revisions 1.11.0036 and 1.11.0037. Please read them carefully before you use the new software.

Contents

Compatibility	Section 1
Documentation	Section 2
Software Changes	Section 3
<i>Post Data - Fix</i>	<i>Section 3.1</i>

Section 1 - Compatibility

1.1 No Changes

There have been no changes to the supported versions of Timberline, Office or Windows.

Section 2 - Documentation

2.1 Documentation

This release is not accompanied by any changes to the printed or online documentation.

Section 3 - Software Changes

3.1 Post Data

In the previous release of Forecast (1.11.0036) the capability to have staggered column Ids introduced a bug in the post function. This was preventing amounts from being posted to cost codes or categories under extras. This problem is resolved by this release.
