

The following release notes describe changes in Event 1 Integrator between revisions 2.80.0006 and 2.80.0008. Please read them carefully before you use the new software.

Contents

Compatibility Section 1
 Integrator database compatibility *Section 1.1*
Documentation Section 2
Software Changes Section 3
 Company Interface *Section 3.1*

Section 1 - Compatibility

- 1.1 Compatibility with Integrator database created by previous versions
 The Integrator database structure has not changed since version 2.80.0008.
-
-

Section 2 - Documentation

- 2.1 Documentation
 There are no changes to any documentation.
-
-

Section 3 - Software Changes

- 3.1 Company Interface
 This release corrects an issue that would be experience by any Australian users of the software. The issue would result in an error message during the Determine Modifications task because of a database difference in the Australian version of Timberline. This has been corrected. Integrator will now use the Australian Bus Number (VABN) field to populate the Federal ID field in the Prolog Manager database.
